CHAPTER ONE

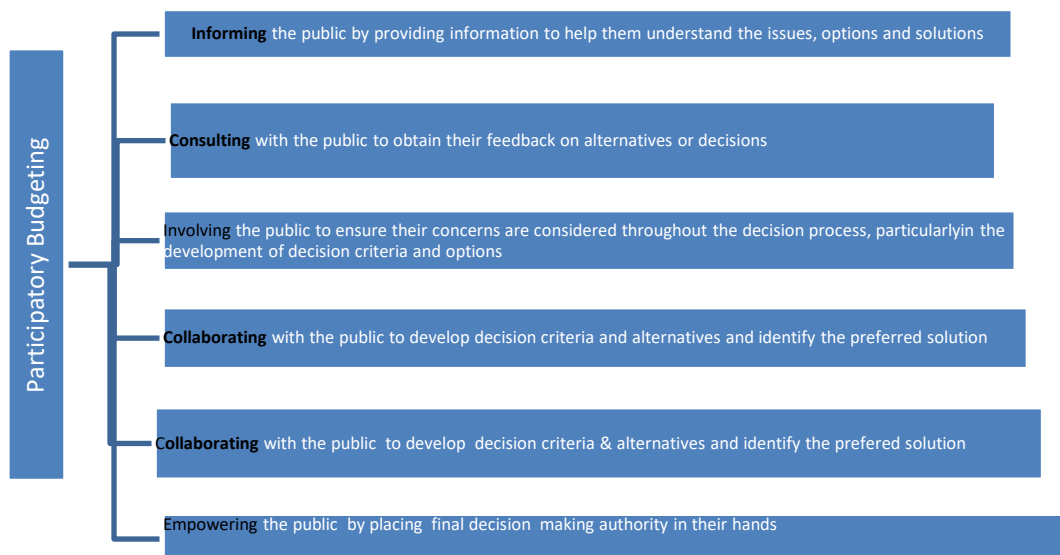

1.0 INTRODUCTION

1.1 Background

Public participation is both a key promise and provision of the Constitution of Kenya 2010. It is enshrined in the national values and principles of governance stipulated in article 10. The Legislature and Executive at both national and county levels are required to engage the public in the processes of policy making, implementation, monitoring, and evaluation.

One of the key aspects of the Kenya's constitution is devolution which has seen massive human and financial resources being devolved into the 47 counties. These resources have polices and laws governing its implementation including public participation of communities members for all the projects and programs that will influence their lives. In West Pokot County, the journey of ensuring community participation in their development planning has not been easy but has improved since its first year of implementation.

Participatory Budgeting entails:

1.2 Legal Framework

Article 1(2) of the Constitution of Kenya, 2010 states that all sovereign power belongs to the people of Kenya. It further states that people may exercise their sovereignty directly or through

their elected representatives. After having already elected representatives, the people ought to directly exercise their sovereignty by being involved in democracy and governance processes at the national and county levels of government.

Article 10 (2) indicates that public participation is among the national values and principles of governance.

As per Article 174(c), the objects of devolution are to give powers of self-governance to the people and enhance their participation in the exercise of the powers of the State and in making decisions affecting them. Article 174(d) recognizes the rights of communities to manage their own affairs and to further their development.

Article 184(1) states that national legislation is to provide for the governance and management of urban areas and cities and shall in particular provide for participation by residents in the governance of urban areas and cities.

Article 232(1) (d) provides for the involvement of the people in the process of policy making and part (f) provides for transparency and provision to the public of timely and accurate information. Fourth Schedule Part 2(14) stipulates that the functions and powers of the county are to ensure and coordinate the participation of communities and locations in governance at the local level. Counties are also to assist communities to develop the administrative capacity for the effective exercise of the functions and powers and participation in governance at the local level.

The Public Finance Management Act under Section 207 provides that County Governments are to establish structures, mechanisms, and guidelines for citizen participation. Under the Urban areas Act, the overarching theme is participation by the residents in the governance of urban areas and cities. The Second Schedule of the Act provides for the rights of, and participation by residents in affairs of their city or urban areas. Similarly, article 125(2) of Public Finance Management Act 2012 states that The County Executive Committee member for finance shall ensure that there is public participation in the budget process.

1.3 Specific Objectives of Participatory Budgeting

The following specific objectives were to be achieved:

- a. To engage stakeholders on identification, ranking and prioritization of new county projects
- b. To determine economic and social viability of the new projects and ensure community ownership to strengthen sustainability.
- c. To ensure openness and accountability in public finance management system. This would be achieved through providing stakeholders/community feedbacks on county policies, projects and programmes currently being implemented and the new proposals for Fiscal year 2023/2024.
- d. To ensure that the county public finance system promotes an equitable society and in particular expenditure that promotes the equitable development of the county, including by making special provision for the marginalized groups and areas. This would be achieved through harmonization and integration of results of the top down and bottom up planning approaches.

1.4 Rationale for Participatory Budgeting

The rationale of Participatory Budgeting is based on the constitutional foundation which places sovereign power on the people of Kenya. It is this power that has been delegated to state actors at the national and county levels. This sovereignty must be respected and institutionalized in all processes of governance.

The benefits of public participation can be summarized as follows:

a. Strengthens democracy and governance.

By engaging in public participation, the public exercise their constitutional right and the decision-making process becomes more representative. Openness to the public provides a platform in which they present their concerns. Insufficient public engagement limits the power of the people to participate in democratic governance.

b. Increases accountability

Participation improves transparency and accountability. The public is able to critically engage in the social, political, cultural, economic, and environmental impacts of policies, laws and development plans. It gives the public a say in deciding how costs and benefits will impact different segments of society. Public participation also ensures that governments are held to account for their actions and are responsive to the interest of citizens. Participation also enhances public confidence and support of the decision-making processes.

c. Improves process quality and results in better decisions.

Public participation enables governments to understand and appreciate different opinions and concerns. Before policies are approved, they undergo a comprehensive review and revision thus ensuring that policies, laws and development plans are robust. Participation provides additional skills, knowledge, concerns, and ideas that might have been overlooked had the process been limited to government officials. Overall, this should result in a better decision and greater ownership by all stakeholders.

d. Manages social conflicts.

Public participation helps alleviate social conflicts, by taking care of the interests of different stakeholders and building consensus. Investment in public participation at an early stage minimizes the number and magnitude of social conflicts arising over the course of the implementation of policies, laws and development plans.

e. Enhances process legitimacy.

Without significant public participation, citizens may become suspicious and feel manipulated. This would undermine effective dialogue and create distrust. Public participation therefore legitimizes implementation processes.

1.5 FY 2023/2024 Participatory Budgeting Process and Methodology

Step 1 – Training of CBEF members and Ward Administrator’s on Participatory Budgeting (PB)

A joint training was held between all County Budget Economic Forum members, ward administrators and a few representatives from the civil society to remind the participants on need for public participation, minimum requirements for PB, verify and confirm all projects implemented in all Wards that were on going and completed and finally give each ward the opportunity to choose areas where Participatory Budgeting will take place in their wards and dates. These training achieved 3 things:

- a) Public participation work plan was approved by CBEF. A CBEF team leader, County Planning Unit and technical officers were appointed for each team.
- b) All finished and on-going projects were identified by each ward and confirmed.
- c) Mobilization strategy was done and the area ward managers, area chiefs and their assistants and ward administrators were identified to help in mobilizing the public in the various identified dates. Mobilization was done for 2 weeks in a local radio station and national newspaper to ensure communities attend.

- d) Basic minimum requirements for PB agreed on i.e to be done in an open place & strategic, community to vote to choose their projects, choosing of representations from all sub locations and minority group, duration for mobilization.

Step 2 - Public Participation Process

This was done in all the 20 wards of the county. The process was led by the ward administrator's, CBEF Members, County Economic Planning section, area MCA's, ward managers, chiefs and representative from office of County Commissioner. All projects status, ongoing projects in the Supplementary one Budget Estimates was shared to the public and given the opportunity to react. All members of the public were invited including civil society groups. These meetings achieved the following:

1. A list of all their project submissions and priority projects; emphasis to be directed in completion and equipping the ongoing projects
2. Communities were requested to vote for the three most critical priorities.
3. All priorities were documented in order of rankings from the public participation and signed by the area CBEF Members, ward manager, area MCA, chosen delegate and ass. Chiefs.
4. Answers were provided to questions arising from the public/community on County budget

Step 3: Documentation of Reports from Wards.

The Economic Planning section co-ordinated the documentation of the entire field reports including their top priorities. With the support of technical teams from each department at the county level, they gave their inputs and separated county and national functions from the prioritised projects.

Step 4: Validation meeting with area MCA's

A meeting was held between the economic planning section and county assembly (MCA's), where the MCA's were requested to identify/validate ward specific projects and award allocations. This was to ensure that the politicians believe in the process and to reduce changes to the budget once tabled in their assembly.

Participatory Budgeting in progress in Endough Ward

1.6 Gender Sensitivity, Participation and Analysis

Public participation turnout youths improved by 108 percent from the previous year. There has also been significant improvement in women participation from 31.4% per cent in 2022 to 34.3 per cent in 2023. Gender mainstreaming has been identified as a global strategy to promote gender equality. This ensures that women and men's concerns and experiences form an integral part of the identification, design, implementation, monitoring & evaluation of projects and programs. This is achieved through gender budgeting and use of gender sensitive indicators among others. Despite the good turnout of women, their participation is still being hindered by their low education levels and cultural belief system. The table below shows the breakdown for each ward:

CHAPTER THREE

3.0 CHALLENGES, RECOMMENDATIONS AND CONCLUSION

3.1 Introduction

The County uses public forums to engage the public on budgets and projects. This is year public participation was done in ward level whereby people from all sub-locations gathered to air their views.

Therefore this report provides a summary of challenges encountered during public participation process, recommendations for action and conclusion.

3.2 Challenges and Observations

- Need of all water points/boreholes to be upgraded to solar powered
- Allocate more fund on purchase of certified maize seeds and fertilizers and ensure transparency in its distribution to farmers
- There is shortages of ECDE teachers countywide
- Uncoordinated planning from the two level of the government which results to duplication in term of allocation of resources
- Insecurity is still a challenge in some small part of the County
- High expectations from community members –Residents wanted the county government to fast track operationalization of processing plants,Nasukuta Export Meat processing plant, Kapenguria University and Aramaket ECDE college.
- Slow implementation of the development projects. This is slowly eroding public confidence.
- Lack of funds to give feedback to communities per sub location on the projects that have been approved to further enhance ownership and participatory monitoring of the approved projects. This will give the planning team, MCA's and County legitimacy to call for other PB next year.
- High illiteracy levels and community capacity gaps on participatory budgeting and planning and functions of each level of government.
- Women participation in the public participation process is still low. Complained of West Pokot County Government neglecting women by not facilitating/budgeting for their issues

- The uneven physical terrain of the county inhibits equitable and effective coverage of the targeted population.

3.3 Recommendations

- Allocate Funds to recruit more ECDE teachers
- There is a need to further strengthen community communication feedback mechanism, and public participation process.
- Integration of the needs for special groups (women, youth and Persons with disabilities) should be given due attention.
- County departments to fast tract the implementation of FY 2022/2023 development budget so that the projects' implementation does not spill over to the 2023/24 fiscal year.
- Regular and targeted civic education needs to be conducted to sensitize community members on their roles and responsibilities under the devolved system of governance. Community fora could also be held on a quarterly basis in each ward to sensitize and get feedback from the community on the access, affordability and quality of services offered by the county government.
- Requested County Government to look on Boundaries issues to overcome border security issues.
- There is need for a strategy to ensure improved and effective youth and women participation in the future county budgets. The relevant line department and county planning unit to ensure this objective is realized.
- The projects should be equitably distributed within each sub location to ensure there is fairness and equity.
- Strengthen county M&E unit and county departments' ability to supervise and monitor projects to ensure quality of works and timely completion of programmes. Need to strengthen supervision, audit, monitoring and evaluation of projects and programmes to ensure value for money of public funds is realized.
- Bills of quantities should be prepared early to avoid late implementation of projects. Procurement processes should also be completed on time.

3.4 Conclusion

Citizen Participation improves transparency and accountability. The public is able to critically engage in the social, political, cultural, economic, and environmental impacts of policies, laws

and development plans. It gives the public a say in deciding how costs and benefits will impact different segments of society. Public participation also ensures that governments are held to account for their actions and are responsive to the interest of citizens. Participation also enhances public confidence and support of the decision making processes. This process must therefore be continuously improved to realize its objectives.
